# Examples of challenges

## The power of sun

How might we push and enable the Swiss population to transition to solar energy for their houses?

## Optimization of energy storage

How can we optimize energy storage solutions to meet the growing demand for reliable and sustainable energy?

# Terms for the industry challenge

## What you get

- Access to all project teams that applied and possibility to collaborate with your selected teams.
- Broadcasting of your challenge to activate the co-creation process and acquisition of the teams to solve your challenge.
- Fully managed challenge solving process with hosting & facilitation of workshops and events.
- Matching fund of minimum 20'000 CHF provided by the Energy Lab to fund further teams.

## What you give

- Provide a business relevant challenge
- Participation in the pitch and enrich workshop (1 day on site)
- Providing information and guidance for the challenge
- Be part of the jury
- Fund one project team with 20'000 CHF

# About the Energy Lab

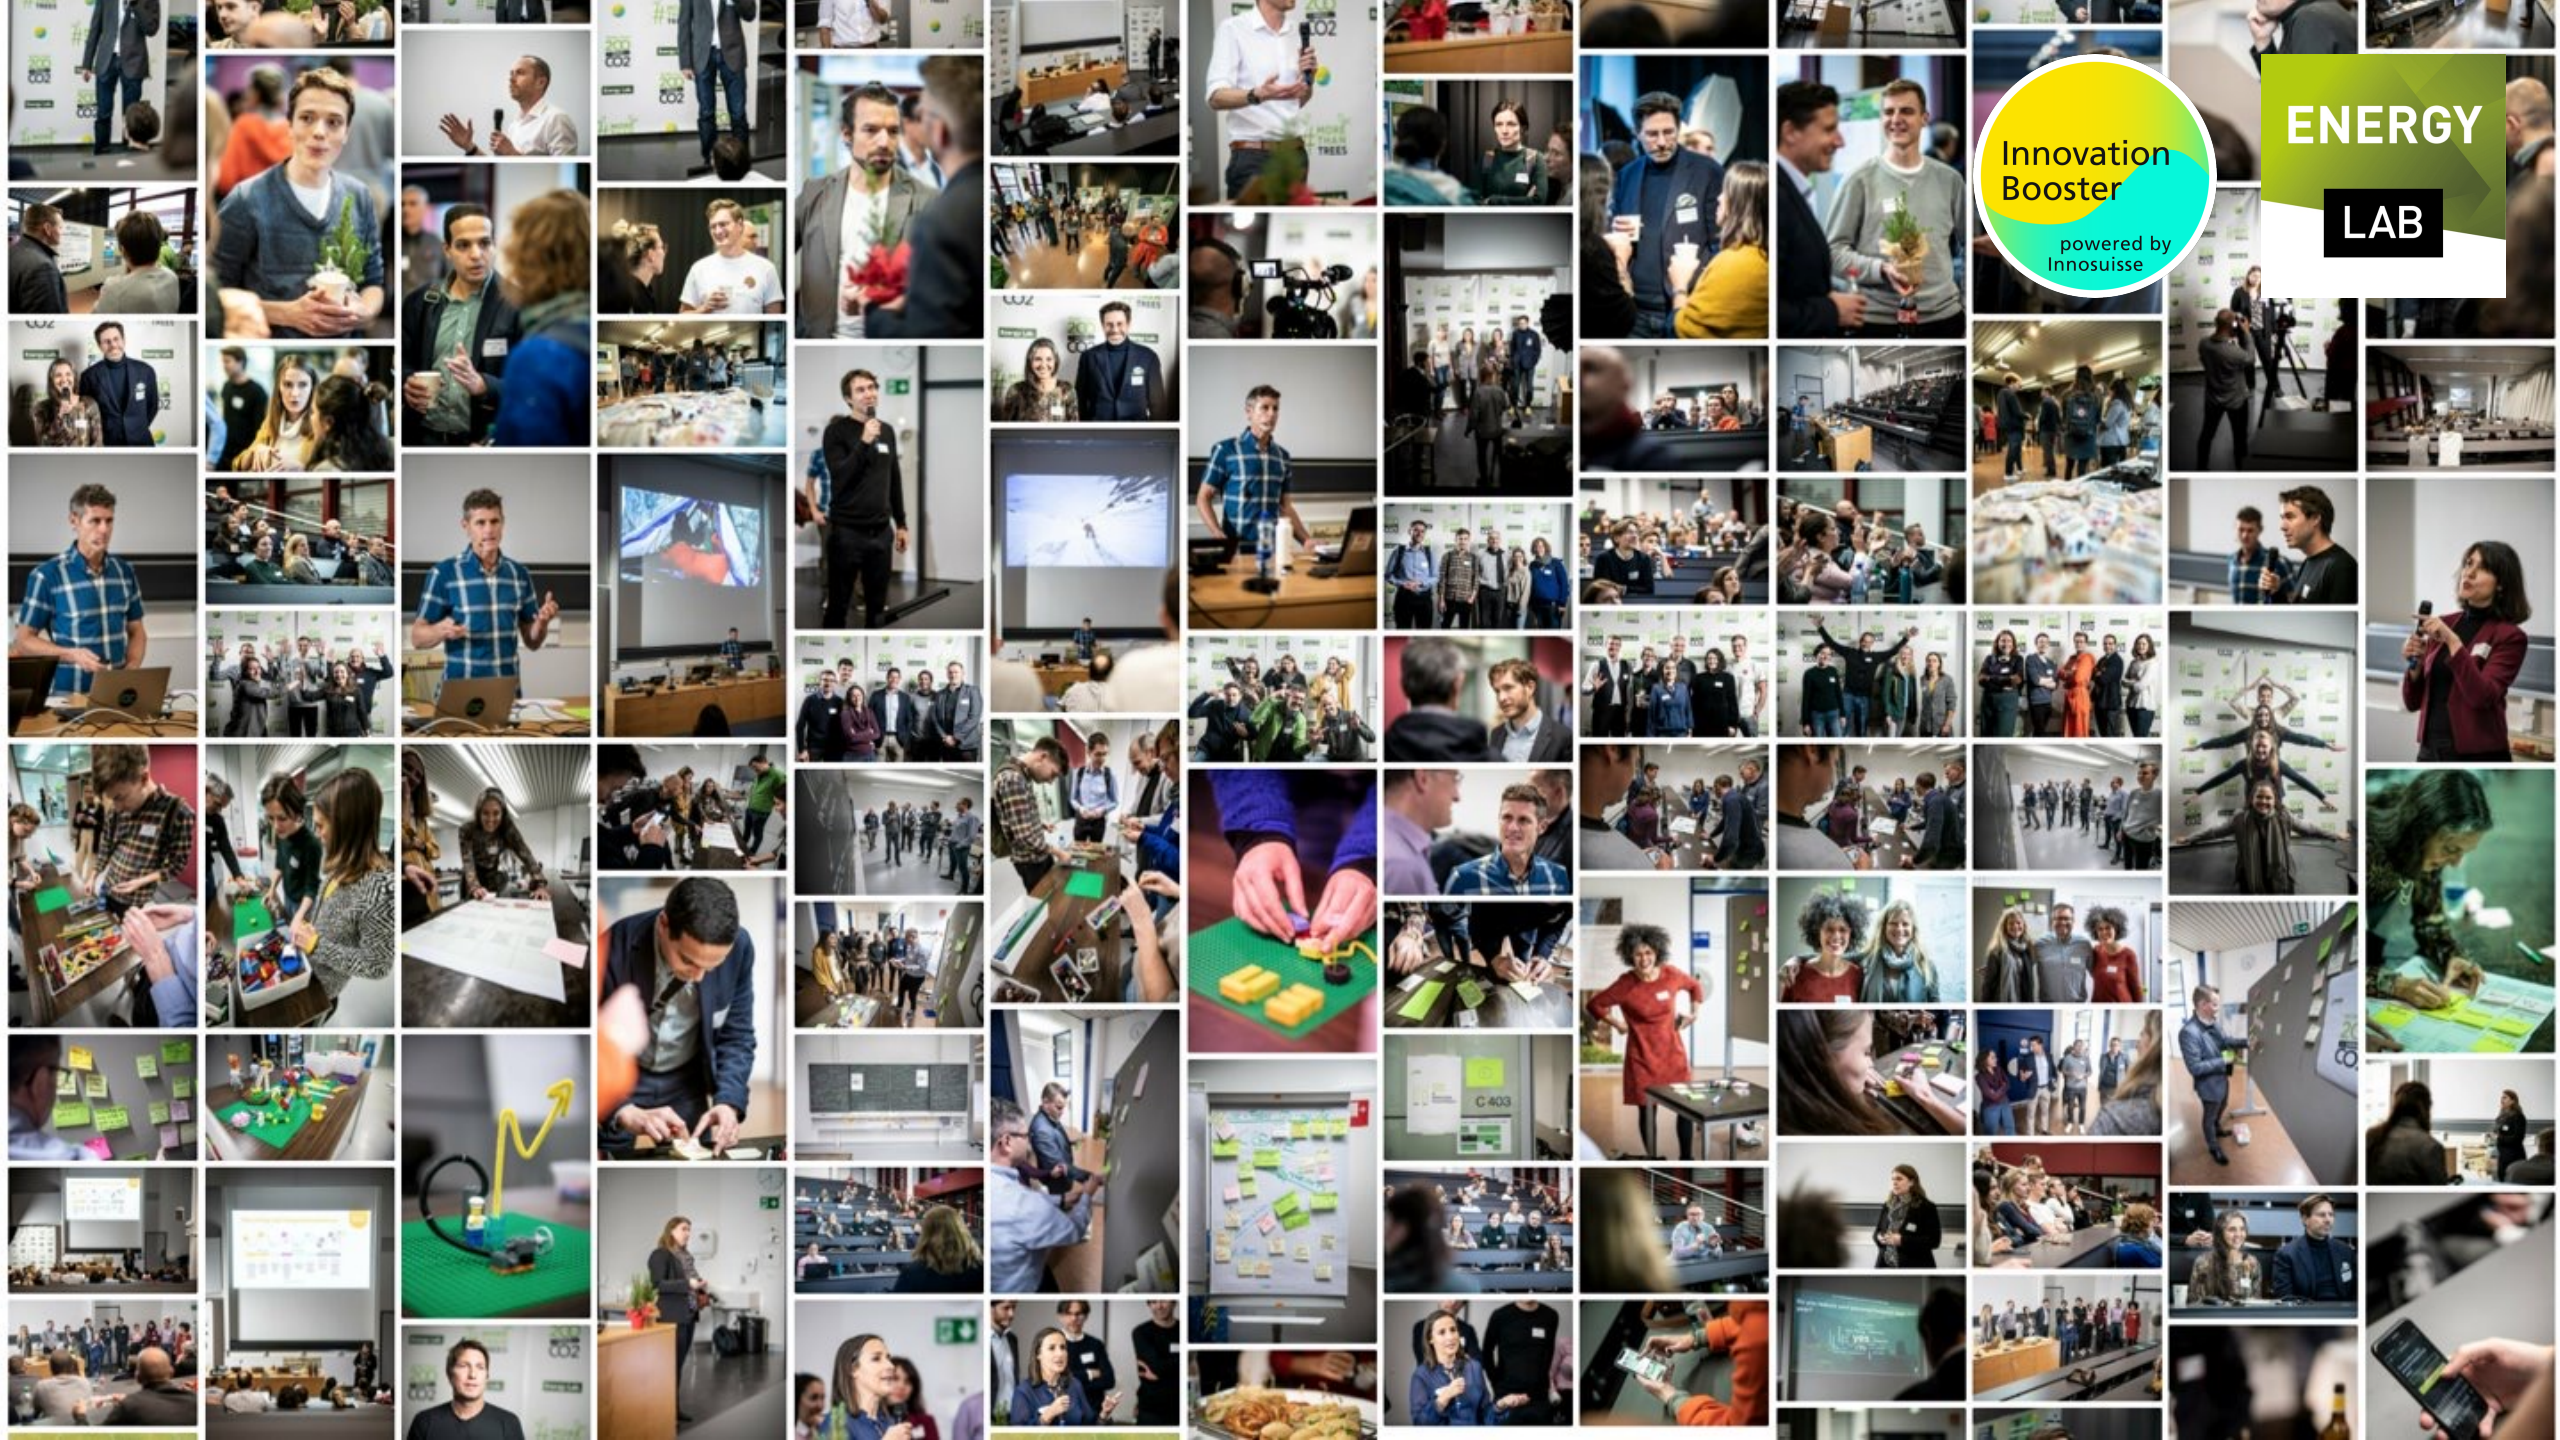

The Energy Lab has received more than **130 project ideas** in several calls for proposals and has successfully funded **51 projects** with a total volume of around **CHF 840,000** to date. The Energy Lab is an innovation ecosystem consisting of more than 200 proactive partners and relevant research institutions in Switzerland. Our mission is to boost the energy transition through joint innovations. In a multistage bottom-up, agile process we create solutions with real impact and economic benefits for implementation partners.

## Focus

We consider all aspects of the energy strategy 2050 including the energy supply, distribution and demand in buildings, mobility and industry. We work on innovative solutions for a decarbonized and sustainable future.

## Benefits

In order to enable and accelerate innovation, we match project ideas with appropriate experts and partners. Thanks to the approved application within the Innovation Booster program of Innosuisse, we are able to support projects with funding and expertise.
